FULL STACK WEB DEVELOPER

Exceed revenue & cost savings targets | Improve operational service & delivery

As a motivated and enthusiastic junior web developer, possess a solid foundation in full-stack development and a strong eagerness to learn and grow in the field. With proficiency in HTML, CSS, and JavaScript, I am adept at creating visually appealing and responsive user interfaces. I have hands-on experience with frameworks like React.js and Node.js, allowing me to build dynamic and interactive web applications. Additionally, I am familiar with backend technologies such as Express.js and databases like MongoDB, enabling me to handle data storage and retrieval. I am a detail-oriented problem solver, committed to writing clean and well-structured code. With a collaborative mindset and effective communication skills, I thrive in team environments and am excited to contribute my skills to create innovative and user-friendly web solutions.

Lean Management | IT Integration | Global Logistics Supply Chain

Service Delivery | Strategic & Operational Planning | Profit & Loss Management

PROFESSIONAL EXPERIENCE

ALPHA WIRE / BELDEN INC, Elizabeth, NJ

2005 - Present

Senior Logistics Analyst

Oversee \$45M of revenue generated by international customers by managing 3PL facilities in EMEA and APAC as well as providing exceptional customer service while working with various freight forwarders domestically.

- Created Standard Work for International Shipping throughout Global Logistics Supply Chain which eliminated delays and issues related to customs clearance.
- Established new route into Europe after Brexit through Venlo, NL which attracted additional customers and helped grow EMEA revenue from \$14M in 2018 to \$20M in 2022.
- Eliminated shipping errors caused by incorrect palletizing by creating a custom program for warehouse logistics team.
- Collaborated with Finance, Purchasing, Sales and Operations teams which allowed for better customer service, and accurate forecasting and revenue recognition.
- Reduced shipping cost by 10% by comparing sales activity against set minimum balances quarterly to identify proper stock levels for items in our 3PL facilities in APAC and EMEA and utilizing various modes of transportation based on urgency.

Operations

Oversee \$180M revenue plan and supported 50+ associates across US, APAC and EMEA. Led deployment and training of new system enhancements across all distributions facilities.

- Increased OTD rate from 95% to 98%+ by addressing bottleneck areas, proper cross training and flexing employees into busy areas as needed.

- Worked closely with vendors to standardize product labeling and IT to customize RF functionality which allowed for all material to be received into system within 24 hours.
- Controlled Safety, Quality, Delivery, Operational Performance and Cost KPIs by keeping the team involved and informed through daily LDM meetings.

Project Management

Collaborated cross-functionally to implement system improvements, refine procedures and automate tasks.

- Led system integration project between Alpha Wire and our 3PL partner in Hong Kong which allowed business to grow APAC revenue from \$9M in 2018 to \$25M in 2022.
- Redesigned system logic for locations in DC which allowed for dynamic product assignment and stock consolidation. As a result, PUT AWAY process has been reduced to 24h from the time the material was received vs 4-7 days prior to that change.
- Worked in close collaboration with the IT team to create product label program which fully automated label printing process reducing the time required to complete daily tasks by 75%.

Inventory Management

Managed \$20M perpetual inventory. Facilitated reduction of inventory levels and excess / obsolete materials by analyzing sales activity and providing feedback and suggestions to senior leaders.

- Led inventory reduction initiatives, reducing overall gross inventories 30%.
- Kept inventory levels accurate through daily cycle counts and immediate research on all inventory variances.
